#### **DETAILED ACTION**

##### ***Reissue Applications***

1. This application has been examined. Claims 1-57 are pending.
2. The prior art submitted on 12/20/2001 has been considered as indicated on the enclosed copies of Form PTO-1449.

##### ***Specification***

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

Serial No.: 10/022,211  
Art Unit: 2863

3

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

the Abstract is too long, not in within the range of 50 to 150 words, the word "disclosed" should be avoided. Appropriate correction is required.

4. This application is objected to under 37 CFR 1.172(a) as lacking the written consent of all assignees owning an undivided interest in the patent. The consent of the assignee must be in compliance with 37 CFR 1.172. See MPEP § 1410.01.

A proper assent of the assignee in compliance with 37 CFR 1.172 and 3.73 is required in reply to this Office action.

Applicant is notified that all amendments to the specification and/or claims must comply with 37 CFR 1.173(b). In this case the amendment submitted on 12/20/2001 fail to follow 37 CFR 1.173.

5. Claims 1-57 rejected under 35 U.S.C. 251 as being based upon new matter added to the patent for which reissue is sought. The added material which is not supported by the prior patent is as follows:

a computer storage medium including a stored set of

4

instructions for implementing a method of controlling power consumption in a tilt correcting coil of a monitor.

6. Claims 1-57 rejected under 35 U.S.C. 251 as being improperly broadened in a reissue application made and sworn to by the assignee and not the patentee. A claim is broader in scope than the original claims if it contains within its scope any conceivable product or process which would have infringed the original patent. A claim is broadened if it is broader in any one respect even though it may be narrower in other respects.

#### ***Conclusion***

7. All claims are rejected.
